The RTS "metagame" is expanding fast. Strategize and innovate, adapting your units and tactics in response to each new challenge. Go into the enemy base and produce forts and factories, then build new technologies while expanding your forces to grow your colony. But what if the enemy also builds a fort, or a factory, or a new unit? In Infested Planet, this is just the beginning -

where you'll have to adapt to each and every situation. Powered by NVIDIA® CUDA™ technology, and featuring multiple NVIDIA® GPUs, Infested Planet will exploit new graphical and gameplay capabilities to bring first-person RTS strategy to life. Play the game the way you want to play, regardless of hardware configuration. Key Features: ● Unique human vs. alien battles ● Mind-bending graphics and flexible gameplay ● Creation Mode: Create new heroes, generate, train and fight your army ● Skill Leveling: Challenge your clones with AI opponents of different skill levels ● Special Units: Distinct 'creations' of your forces, like a unit that uses its voice to communicate ● Playable on up to 4 NVIDIA® GPU's with NVIDIA® SLI™ technology Infested Planet is a 2D real-time strategy game of human versus alien colonization. Against this inhospitable, hostile backdrop, the player must lead mankind through the stages of the alien invasion. As a human commander, you must attack and defend your already occupied capital city, build and expand, mutate, and wage war. Infested Planet features:
