FIFA 22 will also include the “Infinitely Sharp Player Movements” feature, providing players with an unprecedented level of physicality and precision on-the-field. Delve into all-new player identities on the pitch with over 100 authentic player faces as available in the game, including the likes of Luka Modric, Alexis Sanchez, Mo Salah and Neymar Jr. The game will also feature a brand new historical setting, the Dominican Republic. Embark on a journey of discovery from the Dominican Republic’s colourful colonial past, to a modern, vibrant nation with some of the most impressive stadiums in the world. Play against some of the best clubs in the world, including Atlético Madrid, Juventus, Barcelona, Manchester United, Real Madrid, PSG and Bayern Munich. See below for all the further details: “This is the best FIFA ever,” said FIFA community manager, Jérôme Saubame, when announcing FIFA 22. “Building on the foundations established by FIFA 20, we’ve introduced new and improved gameplay mechanics that now allow players to do more with the ball in more ways than ever before. With over 3,000 innovations across the game, FIFA 22 will redefine your playing experience as never before.” Creative Director at EA SPORTS, Alex Jebailey said, “FIFA was always famous for its unique gameplay experiences, and this year we’re doubling down on that. The idea of making FUT’s de facto addition to all major sports, the machine that truly changed the way people play FIFA, has been a lifelong goal of ours. I can’t wait to get our community into FIFA 22, and share the game with them.” What’s new in FIFA 22 features: “Infinitely Sharp Player Movements” – Players will now react seamlessly and beautifully, from the moment the ball touches the ground, with increased ball speed, acceleration and movement. Players can now run through challenges with grace and anticipation, and get up and continue their run right away. Player intelligence, individually tracked movements, movements that actually feel as though they were tracked by a player, have been improved too. A lot of work has gone into the way players move and react to player contact, as well as the way players move into the space you want them to, while anticipating and moving to
