BMW ISTA D Rheingold v3.54.12 Standalone SDP v4.18 ISTA-P v3.65.Q: How do you save your compiled shader to a file? I am using Unity 5.6.1p2 and the built in shader editor. If I have a shader and I want to save it out to a file, how can I do that? A: You can use the Unity editor's built-in Shader.Save function. Shader.Save("Shader.asset",Shader.Compile()); The first parameter is the asset name, and the last parameter is the path to save to. The disclosure relates to a method of fabricating a semiconductor device, and a semiconductor device. As integration of semiconductor devices increases, a circuit pattern formed on a semiconductor substrate becomes fine. In such a fine circuit pattern, isolation structures are formed between the adjacent circuit patterns to avoid noise between the adjacent circuit patterns. Such isolation structures may be formed using a shallow trench isolation (STI) method. In the STI method, a trench is formed in an isolation region of the semiconductor substrate. An oxide layer may be formed in the trench. The oxide layer may be planarized to remove a portion of the oxide layer formed on an upper surface of the semiconductor substrate. Thus, the isolation structures may be formed. The gate length of a transistor is becoming finer according to the increase in integration of a semiconductor device. As the gate length is becoming finer, operating characteristics of a semiconductor device may degrade due to a short channel effect. Accordingly, a variety of research has been conducted to prevent the short channel effect.Q: Trying to get property of non-object in php I have code, which is picking up the error, and im trying to find a solution to it. \$bus = new BusService(); \$item_id = \$bus->getUserId(\$_POST['item_id']); \$user_id = \$bus->getUserId(\$_SESSION['user_id']); \$data = \$bus->getItems(\$item_id, \$user_id); var_dump(\$data); here are my functions: public function getUserId(\$user_id) {
